ClariBite: Know What You Eat

FOOD LABELS IN PLAIN LANGUAGE

Priya can't read her kids' snack label

A mother of two in Dehradun sees

INS 621, INS 211, TBHQ

and has no idea if it is safe for her 5-year-old.

WHY NOW?

1. Packaged snacks are now a daily part of kids' diets
2. Quick commerce delivers junk food in 10 minutes
3. Childhood obesity and lifestyle diseases are rising
4. FSSAI label-clarity rules are in national focus
5. AI and smartphones can finally decode labels simply

Why now?

ClariBite is launching at the perfect time: consumers demand transparency, regulators push for accountability, and families seek trustworthy, AI-powered food literacy.

Rising consumer awareness

Families are demanding transparency in food choices more than ever, driven by health concerns and lifestyle changes.

Regulatory push

FSSAI and WHO are tightening food safety standards, creating momentum for verified, consumer-facing platforms.

Post-pandemic health priorities

COVID-19 heightened focus on nutrition, immunity and safe consumption. People want clarity, not confusion.

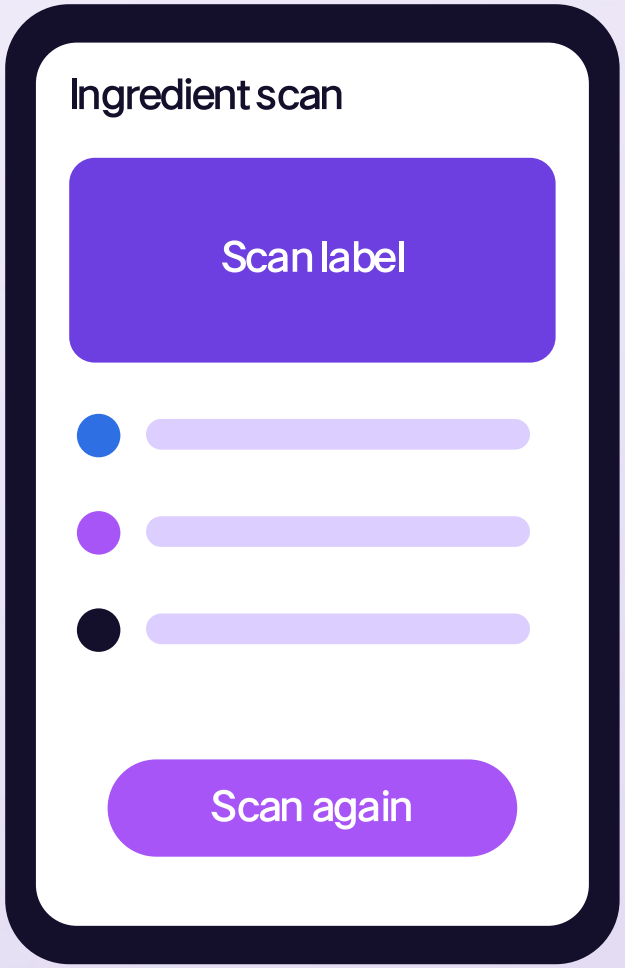

Digital adoption

With smartphones and AI assistants mainstream, consumers are ready for real-time food literacy tools.

Gap in current apps

Nutrition trackers focus on calories, not transparency. There's a clear gap for verified, educational, family-friendly solutions.

The solution: ClariBite app

1. Ingredients explained in simple language
2. Chemical impact by age: 1-10 / 13-18 / 20-28 etc
3. AI awareness videos for kids
4. Day / week / year health impact charts
5. Healthier alternatives within budget

Why ClariBite is different

01

List of chemical substances and ingredients; we explain them simply, with India + global safety data

02

Age-wise impact: not all chemicals are harmful, we show which help or hurt

03

A.I. videos for kids to spread awareness and budget-friendly swap options

04

Long-term impact charts of chemical substances in the human body

Who we serve and who pays

Parents need clarity, kids need awareness, and healthy brands need trusted reach.

PRIMARY USER

Parents

Want to know what they feed their children and find healthier options within budget

Children & Students

Learn through AI videos how packaged food affects their body

PAYERS

Schools & Healthy Brands

Schools run awareness campaigns; healthy food brands sponsor and advertise

Business & sustainability model

01

Schools

School campaigns bring in new parent users

02

Sponsors

Healthy brands bid for top placement in recommendations

03

Video Ads

Food brand ads shown while AI kids' videos generate

04

Social Work

CSR and NGO partnerships for free community access

Impact, SDGs & Uttarakhand

Uttarakhand's growing towns and schools see rising packaged food use. ClariBite brings food literacy to families in Hindi and simple language.

SDG 3

GOOD HEALTH

Fewer diet-linked diseases in children

SDG 4

QUALITY EDUCATION

Food awareness in schools

SDG 12

RESPONSIBLE CONSUMPTION

Informed, healthier choices

₹ 10 Lakh / 90-Day Plan

Milestone: Live app piloted in 10 Uttarakhand schools with 1,000 parent users in 90 days

01

App, data & AI build (Day 1-45)

₹ 5 Lakh

02

School pilots (Day 30-75)

₹ 3 Lakh

03

Expert review & team (Day 1-90)

₹ 2 Lakh

The Ask + Vision 2035

We ask for ₹ 10 lakh seed funding, mentorship, nutrition experts and school access across Uttarakhand.

2026 01

Pilot in Uttarakhand schools

2030 02

1 crore families across India

2035 03

Global food-clarity standard

Eat clear. Live healthy.
